📅 2017 - 2022

📍 Thailand, Chiang Mai

Computer Engineering
Rajamangala University of Technology Lanna

📅 2022 - 2026

📍 Thailand, Chiang Mai

Projects

Fall Detection System using Camera and Alert Notification

2024-2025

This project is an intelligent fall detection system deployed on an NVIDIA Jetson Nano, using camera input and real-time video processing. It continuously monitors for fall events and sends alert notifications when a fall is detected. Designed for edge deployment, this system is ideal for safety-critical applications such as elderly care or remote monitoring.
